4.11 Elan Speed indicators – Cllr Perryman referred to Cllr Chalmers concerns from the last meeting from the last meeting, concerns that the signs were malfunctioning and inaccurate. Cllr Perryman has spoken to technical support and has learnt that the speed signs are quite sensitive and can be triggered by even golf balls. Cllr Perryman has been looking into the sensitivity. Cllr Perryman reports the speeding is coming down a few percent each time data is collected. There is always a high speeder or two but the overall data shows that speed is reducing. Very positive outcome for the Parish.

5.11 **Reports – District and County Council** –District Cllr Neil Jones Reported how impressed he is with Cllr Perryman's work with the speeding data he has collected. The bus shelter could be put on the East Lindsey investment fund. District Cllr Ashton reported echoes District Cllr Neil Jones remarks on Cllr Perryman's commitment to the speeding within the Parish. Brylaine are willing to meet with Cllr Ashton and this is a great start. Very large solar application has been put in for the west of the county, concerns if the pylons come the east will have the grid power for solar which is a worry, although we can appose ultimately it is a government decision. Town and parish scrutiny project aimed to places with no parish council, no level of representation. Environment agency reported on the coast defence along east linsey coast, which is available to view online, from 2040 the concrete sea defences will be deteriorating beyond their safe design standard. Build on top of existing defences was suggested, may not be suitable for that and to reinforce in front or behind with new defences.
